

# GENERAL MANUFACTURING CREDIT (GMC)

Provides credits on monthly demand and energy charges to qualifying manufacturers, making rates more competitive and helping retain manufacturing load in the Tennessee Valley.

## WHY YOU SHOULD PARTICIPATE:

The General Manufacturing Credit offers significant power cost savings to qualifying manufacturers, which in turn helps retain manufacturing load in the Tennessee Valley. A strong manufacturing base helps TVA keep rates low for all consumers.

## ELIGIBILITY REQUIREMENTS:

- A customer has to be served under Part 3 of either the GSA or TGSA schedule, or MSA schedule
- Major use of electricity for activities are classified with:
  - SIC codes 20 through 39,
  - 2002 NAICS code 5181, or
  - 2007 NAICS codes 5182, 522320, and 541214
- Must have a contract with a demand greater than 1,000 kW

## HOW IT WORKS:

For each month<sup>\*</sup> in which an eligible customer has a metered demand that exceeds 1,000 kW<sup>\*\*</sup>, a credit is applied to each kW of metered demand used in determining the firm billing demand and each kWh of firm energy. The General Manufacturing Credit is calculated as:

$$\text{General Manufacturing Credit} = (\$1.38 \times 1,000 \text{ kW}) + (\$1.63 \times (\text{metered kW} - 1,000 \text{ kW})) + (1.076\text{¢} \times \text{firm billing kWh})$$

## HOW TO SUBSCRIBE:

Contact your local power company for more information on program details and the subscription process.

<sup>\*</sup> General Manufacturing credits will be issued once per billing month for each eligible customer account.

<sup>\*\*</sup> Metered demand for the billing month must exceed 1,000 kW.
